The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status	·

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 8, 2004 has been entered.

Claim Rejections - 35 USC § 102

- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-14 and 16-30 are rejected under 35 U.S.C. 102(e) as being anticipated by PG_PUB 2002/0138131 to Solovay et al.

Solavay discloses a stent, having a generally circular cross-section (FIG. 15), comprising an expandable stent body having proximal and distal ends and an outer surface (Figure 13, Paragraph 33); and at least one longitudinal projection (rail 120, spring 121) external to said stent outer surface (FIG. 16), wherein each flexible longitudinal projection acts as a rail to reduce the contact area between the stent and the vessel wall during insertion of the stent and wherein at least one longitudinal projection has a helical configuration (FIG. 16 spring 121); wherein at least one longitudinal projection extends from a point at or

adjacent to the distal end of the stent to a point at or adjacent to the proximal end of the stent. Solovay discloses that the stent may include at least three longitudinal projections equidistantly spaced around the circumference of the stent (Paragraphs 0068 and 0070). The helical coil rails are considered to be tapered at the point where the coil ends. Solovay discloses that the stent may be made of any material that includes those materials that are capable of expansion by balloon, shape-memory materials, and self-expanding materials (Paragraphs 0033 and 0056). The helical rail of Solavay will inherently act as a stress concentrator, since all of the structural limitations are present in Solavay's device. Regarding the rail being integral, the rail is attached to the stent and therefore, it is considered to be integral since it is a part of the stent structure itself.

Response to Arguments

4. Applicant's arguments with respect to claims 1-14 and 15-30 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica R Baxter whose telephone number is 571-272-4691. The examiner can normally be reached on M-F 8:30AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
